

DOCKING MASTER

Take the stress out of docking your boat!

The **Docking Master** is the most advanced wireless remote control docking unit on the market today. It facilitates a full range of movement while you are anywhere on your boat. With this small “Wireless Remote Control”, now the captain can be on the deck while the yacht is approaching and leaving the dock, expanding his vision, awareness and simplifying the docking procedure.

DOCKING MASTER

The Docking Master device was designed with the maximum of simplicity and efficiency by a team of highly experienced marine engineers who put this product through severe and rigorous testing on many different types of vessels to ensure top performance and dependability in any marine environment.

FEATURES

- **ADJUSTABLE TIMER**

Safety feature to delay the signal between 0-4 seconds which guarantees full boat control if the signal is lost for more than one second.

- **HI-GAIN ANTENNA**

Hi-gain antenna tuning at 900MHz (ISM Band) for interference free functionality.

- **HI-SENSITIVITY RECEIVER**

FSK high-sensitivity receiver with proprietary error protocol (our redundancy plus inverted algorithm correction). Every system has a unique digital code link attached to each unit.

- **SWITCHING REGULATOR**

Low EMI switching power supply tested by FCC that allows very low input current and wide input voltage range.

- **SHIFTER/ECC SENSOR**

Fully isolated photocoupler to sense the shifter signal which instantly overrides the boat's electronics with the wireless control system.

COLOUR CODED REMOTE CONTROL UNIT. EASY PORT & STARBOARD PUSH BUTTON CONTROLS.

CONTROLS ALL ENGINES, BOW & STERN THRUSTERS & ANCHOR WINCH.

DOCKING MASTER HAS BEEN THOROUGHLY TESTED TO SAFELY MANEUVER UP TO 300FT MEGA YACHTS.

RETRO FIT TO ANY BOAT

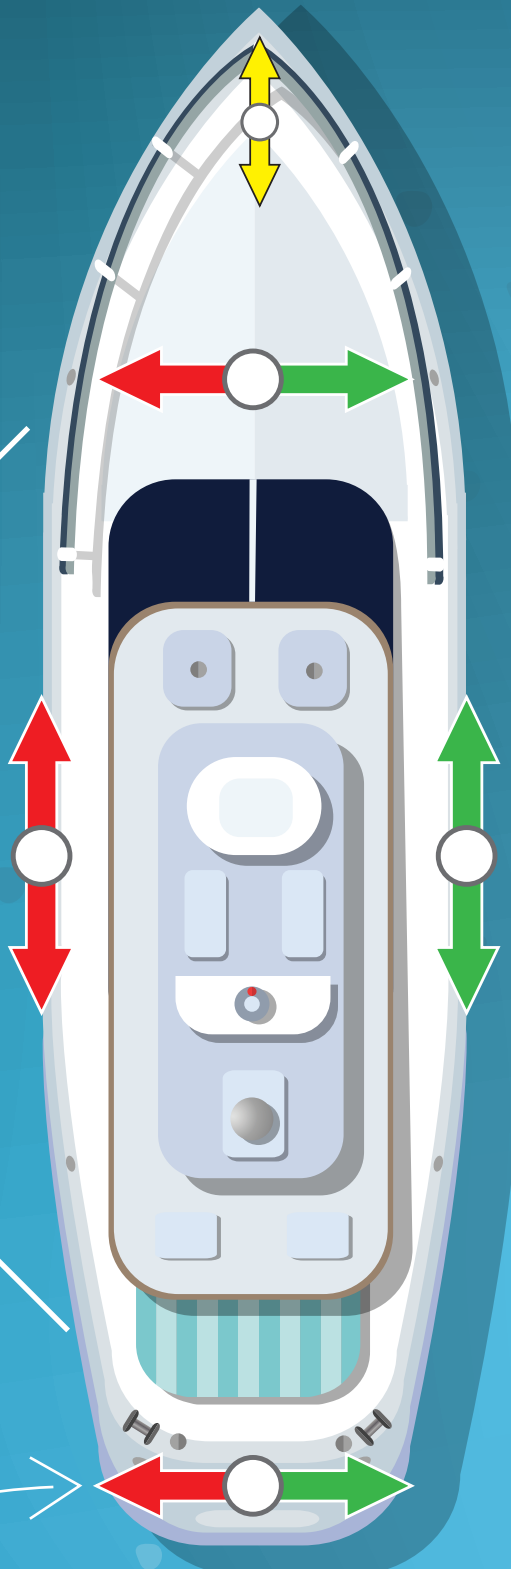

The Docking Master is a design patented and certified leading-edge “Wireless Remote Control System” that enables you to control all of your yacht’s basic maneuvering and mooring functions at the touch of a button! **Docking Master** frees you from the bridge, allowing you to safely step away from the controls to grab a rope, or reposition a fender. Docking Master’s ergonomic, waterproof handheld transmitter (smaller than a standard TV remote) gives you the freedom to check every corner of your boat without ever losing touch with your thrusters, anchor winch and main engine shifters. Best of all, it operates from anywhere onboard your boat!

*STAND ANYWHERE
ON YOUR BOAT
WHILE DOCKING*

TOO EASY!

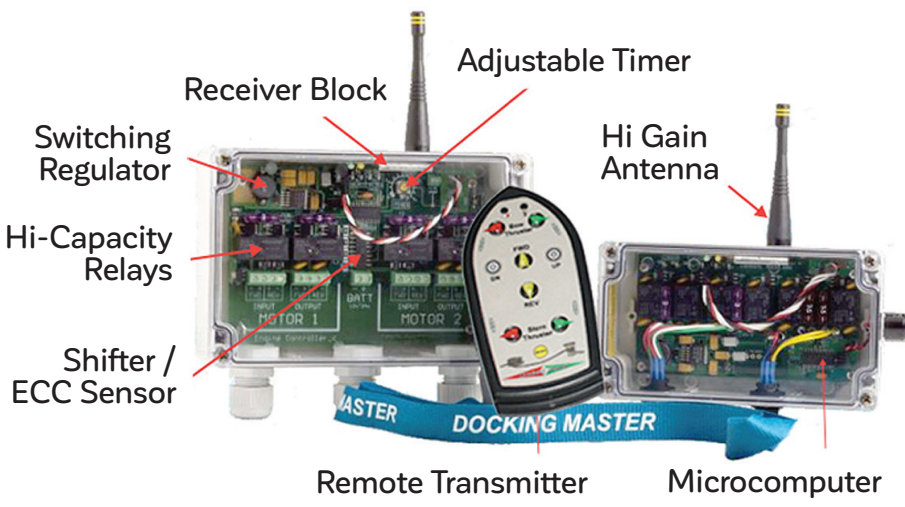

Ergonomically designed to fit the softest or roughest of hands, it responds instantaneously to your commands. The functions are controlled by push button micro-switches, which engage the machinery only as long as they are held down, immediately returning the machinery function to neutral when released. It is ready to be used, 24/7, in any marine environment. It does the work of several deckhands.
